1 Introduction

Make yourself familiar with the device.

Use this manual as reference for the repair of your device.

1.1 User information

Safety

Instructions for use
and safety

- Read this manual thoroughly and completely before starting repair. Keep this manual in an easily accessible location.
- Observe all safety instructions provided also in the instructions for use of the device and in the document "Safety instructions for vacuum equipment"! The document "Safety information for vacuum equipment - Sicherheitshinweise für Vakuumgeräte" is part of the instructions for use!
- In addition to this manual, adhere to any relevant local accident prevention regulations and comply with industrial safety regulations.

General

General
information

- The illustrations in this manual are provided as examples. They are intended to aid in your understanding.
- **VACUUBRAND GMBH + CO KG** reserves the right to modify or change the product design and/or technical specifications at any time without advanced notice.

Contact us

Contact

- Please ask for replacement in case of incomplete instructions for use. Alternatively, you can download instructions for use on our web page: www.vacuubrand.com.
- Contact us regarding any questions about this product, if you need further information, or to provide us with feedback.
- When contacting our Customer Service Department, please be sure to have the data from the rating plate.

1.2 About this document

1.2.1 Symbols and icons

Safety symbols

General danger sign.

Caution! Electrical voltage!

Disconnect equipment from AC power.

Read manual.

Additional icons

Attention!
Observe precautions for handling electrostatic sensitive devices.

Convention for additional notes

Refers to content of other documents.

Additional notes

IMPORTANT! Information or specific use recommendation, which must be observed.

⇒ Helpful tips

⇒ Additional information

1.2.2 Display conventions

Warning levels

Convention for warnings

	DANGER
	Indicates an imminent hazardous situation. Disregarding the situation will result in serious and even fatal injury or death. ⇒ Take appropriate action to avoid dangerous situation!
	WARNING
	Indicates a potentially hazardous situation. Disregarding the situation could result in serious, even fatal injury or massive damage to property. ⇒ Observe instruction to avoid dangerous situation!
	CAUTION
	Indicates a potentially hazardous situation. Disregarding the situation could result in slight or minor injury or damage to property. ⇒ Observe instruction to avoid dangerous situation!

Individual step (single step)

Design of steps

⇒ Do the described step.

☒ Result of action.

Multiple steps

Graphic

1. First step,
2. next step.

☒ Result of action.

Follow steps in the described order.

2 Safety instructions

All safety instructions must be observed by all individuals working with the products described here.

Maintenance and repair are intended to ensure the functional condition or the return to function in the event of a failure.

Repair includes troubleshooting and remedy.

2.1 Target groups

Qualified
personnel

Maintenance and repair may only be carried out by suitable qualified personnel.

The qualified personnel has to carry out the necessary work in accordance with the statutory requirements (e.g., safety at work, environmental protection).

The function and safety of the device must not be impaired.

The qualified personnel must be adequately informed of the risk involved in their intervention.

The qualified personnel must be adequately informed of potentially hazardous substances in the device.

2.2 Safety precautions

Quality standards
and safety

Products of **VACUUBRAND GMBH + CO KG** are subject to high quality tests with goals for safety and operation. Prior to delivery each product has been tested thoroughly.

Nevertheless, during operation unforeseen dangerous situations may occur which may lead to injuries or damage of property.

Therefore observe the following chapter and take the appropriate safety precautions.

2.2.1 Personal responsibility

Qualification and
personal
responsibility

Ensure that only authorized and skilled personnel works with the equipment. This is particularly important with regard to troubleshooting and remedy.

- ⇒ Carefully read these instructions for repair before starting work.
- ⇒ Replace wear parts regularly.
- ⇒ Never operate a defective or damaged device.
- ⇒ Personal safety has top priority!
- ⇒ Always be conscious of safety.
- ⇒ Observe the owners' directives at work, the national accident prevention regulations and occupational safety provisions.

2.2.2 Eliminate sources of danger

Use only in proper
working condition

Only use the vacuum system when it is in proper working condition.

- ⇒ Carry out maintenance and repair outside the hazardous area, i.e., outside potential explosive atmospheres.

Safe work

The owner must determine additional protective measures to ensure safe personal protection if work has to carry out inside a hazardous area.

- ⇒ Observe the operating instructions of the owner.
- ⇒ Switch off the device prior to maintenance and repair.
- ⇒ Secure the device against restarting.

Dangerous voltage

Parts may carry dangerous voltages for some minutes even when the device is switched off.

To avoid fatal injuries to not carry out any work during this period.

- ⇒ Mark activities at the device appropriately, e. g. using a instruction plate. Ensure that the instruction plate is available also during temporary interruption.
- ⇒ Afterwards restore the protective equipment immediately, if you have deactivated safety functions and protective equipment due to maintenance or repair work.

- ⇒ Replace defective components by new components with the same order number or by equivalent components.
- ⇒ Prevent the entry of liquids or dust in the device.

Health hazards

The device may be contaminated with substances dangerous to health or otherwise dangerous substances.

Decontaminate or clean the device prior to maintenance or repair, if necessary.

Observe safety and protective measures when working with hazardous substances.

Ask regularly for actual material safety data sheets.

Observe the owners' hazardous substances operating instructions.

Wear your personal protective equipment.

2.3 Environmental protection

Observe environmental regulation

Observe the national and international environmental regulations for disposal of your product as well as spare parts. This applies particularly to all components that are contaminated with hazardous substances.

Dispose of chemicals, e. g., cleaning agent, according to regulations.

Scrapping and waste disposal

Proper disposal

As a result of increased environmental awareness and more stringent general requirements imposed by environmental legislation, a proper scrapping and disposal of no longer usable or non-repairable equipment is required.

If you wish to dispose of a VACUUBRAND electrical or electronic device, this must be done separately from unsorted municipal waste. This is indicated by the symbol of the crossed-out wheeled bin (see illustration).

VACUUBRAND offers to dispose of your device with this symbol for you.

To do this, please contact our service team.

Please note the data privacy rules and delete all data on the device.

service@vacuubrand.com

Tel.: +49 9342 808 5660

3 Notes concerning repair

IMPORTANT! Replace defective parts in any case.

3.1 Lifetime when used as intended

Part	Operating hours
Diaphragm	15000
Valve	15000
Motor capacitor	10000 - 40000
Motor bearing	40000

**WARNING****Risk of injury due to a disassembled device.**

Operating a disassembled device may lead to personal injury.

- ⇒ Never operated a opened or disassembled device.
- ⇒ Ensure that a disassembled device never starts unintentionally.

**WARNING****Damage due to an overaged motor capacitor.**

If an old motor capacitor fails, the capacitor may get hot. It may even melt or emit a flame,

- ⇒ Check every capacitor regularly by measuring its capacity and estimating its operation time. Exchange old capacitors early enough to prevent a failure.
- ⇒ The capacitors have to be replaced by a qualified electrician.

**CAUTION****Damage due to defective wear parts.**

Defective wear parts may lead to failure of the device.

- ⇒ Wear parts have to be replaced in time.

**DANGER****Danger of electric shock.**

Improperly executed repairs will result in an electrical shock.

- ⇒ Check the electrical safety of the device according to IEC 61010 and national regulations after repair.
- ⇒ Check the protective conductor resistance.
- ⇒ Check the insulation resistance.
- ⇒ Carry out a high voltage test.
- ⇒ Check the leakage current.

3.2 Prior to maintenance and repair

Preparation

Genuine spare
parts

⇒ Use only genuine spare parts and accessories.

When using components of other manufacturers the safety and performance of the equipment as well as the electromagnetic compatibility of the equipment might be reduced.

Possibly the CE mark or the C/US conformity (see rating plate) becomes void if not using genuine spare parts.

⇒ Check that the required tools and parts are available and of the correct type before you start your work.

⇒ Check the operating sequence mentally using exploded view drawings, spare parts lists and circuit diagram on feasibility, safety requirements and consequences on safety and function of the equipment.

⇒ Vent the device.

⇒ Allow the device to cool down.

⇒ Separate the device from mains prior to maintenance or repair. Switch off the device and unplug.

⇒ Allow the capacitors to discharge.

⇒ Ensure ESD protection measures at the workplace.

Separate from
mains

3.3 After maintenance or repair

Testing

Testing

Check operability and safety after maintenance and repair.

⇒ Check the safety of the device according to IEC 61010 and national regulations.

BVC control / G and BVC professional / G

⇒ Check the ultimate vacuum of the pump after maintenance and repair.

BVC control / G
BVC professional
/ G

The pump achieves its ultimate vacuum if switching off at an atmospheric pressure > 1000 mbar absolute, a maximum underpressure of 850 mbar (8 LEDs glow) and a leak-free apparatus.

BVC professional / G

⇒ Adjust the liquid level sensor if necessary.

Adjusting the liquid level sensor is described in the instructions for use of the device.

3.4 Replacing diaphragms and valves

Inspection and maintenance of the pump heads and **replacement of diaphragms and valves** is described in the instructions for use of the device.

Please ask for replacement in case of missing instructions for use. Alternatively, you can download instructions for use on our web page: www.vacuubrand.com.

In case of problems return the device to the factory for inspection or repair if necessary.

⇒ Observe section „Return“.

4 Replacing the main switch

Spare part

Main switch, blue (635239)

Tool

Torx screw driver TX20

DANGER

Danger of electric shock.

A defective main switch will result in an electrical shock.

- ⇒ Replace a defective main switch immediately.
- ⇒ Replacement of the main switch must be carried out by a qualified electrician.

DANGER

Danger of electric shock.

Improperly executed repairs will result in an electrical shock.

- ⇒ Check the electrical safety of the device according to IEC 61010 and national regulations after repair.
- ⇒ Check the protective conductor resistance.
- ⇒ Check the insulation resistance.
- ⇒ Carry out a high voltage test.
- ⇒ Check the leakage current.

CAUTION

Electrostatic discharge (ESD).

Electronic components can be damaged or destroyed if ESD protection measures are not observed.

- ⇒ Ensure ESD protection measures at the workplace.

1. Depending on BVC version, remove connection tubing at the hose nozzle or detach quick coupling.

2. Remove bottle from support.

3. Lay down the BVC as shown.
4. Unscrew screws at the base plate.

5. Slide the base plate to the side. It is not necessary to disconnect the earth cables.

IMPORTANT! Ensure ESD protection measures at the workplace.

The pressure sensor (see mark) is sensitive to electrostatic discharge.

Do not touch the pressure sensor, observe ESD protection measures!

6. Mark the cables if necessary.

7. If necessary, note the position of the cables on the switch (1a, 1b, 2a, 2b) and disconnect the cables from the switch.

8. Press the tabs at the main switch together and press the bottom of the main switch.

9. Remove the main switch from housing.

10. Take care of the lugs at the main switch and the recesses provided in the housing when assembling the main switch.
11. Insert the main switch in the housing.

12. Plug the cables on the main switch correctly.

13. Check the firm seat of the circuit board.
14. Press the mounting clips if necessary.

15. Check the firm seat of the earth cables at the base plate.

16. Position the base plate.
17. Screw the base plate.

18. Position the BVC on the feet.
19. Position bottle in the support.

20. Depending on BVC version, position tubing to hose nozzle or quick coupling.

DANGER

Danger of electric shock.

Improperly executed repairs will result in an electrical shock.

- ⇒ Check the electrical safety of the device according to IEC 61010 and national regulations after repair.
- ⇒ Check the protective conductor resistance.
- ⇒ Check the insulation resistance.
- ⇒ Carry out a high voltage test.
- ⇒ Check the leakage current.

5 Replacing the motor capacitor

Spare part capacitor on request

- Please be sure to include the serial number of the device with your request.

Tool

Torx screw driver TX20

Open-ended wrench SW 13, 17, 19

DANGER

Danger of electric shock.

Improperly executed repairs will result in an electrical shock.

- ⇒ Check the electrical safety of the device according to IEC 61010 and national regulations after repair.
- ⇒ Check the protective conductor resistance.
- ⇒ Check the insulation resistance.
- ⇒ Carry out a high voltage test.
- ⇒ Check the leakage current.

WARNING

Damage due to an overaged motor capacitor.

If an old motor capacitor fails, the capacitor may get hot. It may even melt or emit a flame.

- ⇒ Check every capacitor regularly by measuring its capacity and estimating its operation time. Exchange old capacitors early enough to prevent a failure.
- ⇒ The capacitors have to be replaced by a qualified electrician.

1. Depending on BVC version, remove connection tubing at the hose nozzle or detach quick coupling.

2. Remove bottle from support.

3. Depending on BVC version, unscrew the hose nozzle or the coupling.

4. Unscrew the cover.
5. Pay attention to washers.

6. Loosen the union nut.

7. Turn away hose from hose connector.

8. Lay down the BVC as shown.

9. Unscrew screws at the base plate.

10. Slide the base plate to the side.

11. Pull both earth cables from base plate.

⇒ Electronic components are sensitive to electrostatic discharge (ESD).

⇒ Observe ESD protective measures.

12. Pull both cables at the main switch.

13. Unscrew the four screws fixing the motor.

14. Hold the pump and position the BVC on the feet.

15. Lift the pump from holder.

- 16. Place the pump as shown.
- 17. Remove the blind.

- 18. Unscrew the motor capacitor.

- 19. Pull both cables at the motor capacitor.
- 20. Attach both cables to the new motor capacitor.
- 21. Screw the motor capacitor to blind.

- 22. Insert the cable through the opening in the blind.
- 23. Pay attention to correct position of the blind in the housing.
- 24. Slide the blind on the pump.

- 25. Pay attention to cables. Do not squeeze cables.
- 26. Insert the cables through the holder.
- 27. Position pump in holder.

- 28. Hold the pump and lay down the BVC.
- 29. Screw the pump.

- 30. Connect the cables.

- 31. Twist the earth cables three times.
- 32. Plug the earth cables to the base plate.

33. Position the base plate.

34. Screw the base plate.

35. Position the BVC on the feet.

36. Connect hose to hose connector.

37. Screw the union nut.

38. Position blind in holder if necessary.

Only BVC professional / G:

During repair it may happen that the blind with liquid level sensor foil falls out from the holder.

Do not squeeze the foil cable when assembling the blind.

39. Screw the blind.

40. Depending on BVC version, screw coupling or hose nozzle.

41. Position bottle in the support.

42. Depending on BVC version, position tubing to hose nozzle or quick coupling.

DANGER

Danger of electric shock.

Improperly executed repairs will result in an electrical shock.

- ⇒ Check the electrical safety of the device according to IEC 61010 and national regulations after repair.
- ⇒ Check the protective conductor resistance.
- ⇒ Check the insulation resistance.
- ⇒ Carry out a high voltage test.
- ⇒ Check the leakage current.
